As a result of the put exercise, LDCH now owns indirectly 76.6% of Biosev shares and the resulting free-float is 23.4%. The transaction will be settled on July 24, 2014.

As the exercise of the put resulted in a reduction of the free-float by more than 1/3, Biosev's controlling shareholder has the right to reconstitute Biosev's float for the amount of shares that exceeded 1/3 of the float, within a period of 18 months. In line with the requirements of the Novo Mercado, Biosev has the right to reconstitute its minimum free float of 25% within a period of 6 months.

Biosev takes this opportunity to highlight that LDCH has indicated to the company that it is its intention to maintain the listing status of Biosev on the Novo Mercado.

The company will take a call with analysts and investors in order to provide further details in case it is necessary.

Please see the details for the call on the left side box .

Biosev is the world's second largest sugar cane processor, with 11 industrial facilities strategically located in four Agroindustrial Clusters in Brazil. The Company is controlled by the Louis Dreyfus Commodities Holdings Group and started operating in the sugar and ethanol industry in 2000, when it acquired its first unit in Brazil. Since then it has built a successful track record of growth through both acquisitions and expansion projects that have led its crushing capacity to increase from 0.9 million metric tons/year in 2000 to 36.4 million metric tons/year today. Biosev manages 340,000 hectares of land and has surplus biomass power generation capacity of 1,346 GWh. The Company adopts the highest standards of corporate governance and its stock is traded on the Novo Mercado segment of the Brazilian stock exchange (BM&FBovespa).
